

## Technical Innovation in **Steelwork Connections**

Lindapter®, the inventor and manufacturer of steelwork clamping systems, has developed a range of patented High Slip Resistance (HSR) girder clamps specifically for frictional applications and high tensile loading.

### WHY USE LINDAPTER HSR CLAMPS?

### **SAVE TIME & MONEY**

Steel sections are simply clamped together, avoiding time-consuming methods such as welding or conventional drilling and bolting.

### **HIGH STRENGTH & DURABILITY**

Lindapter's HSR clamps are manufactured from high strength SG iron with a hot dip galvanised coating to resist both high load requirements and aggressive environments.

### **ADJUSTABILITY**

Steel sections can be quickly aligned by sliding the section into the correct position before tightening the clamp assembly to complete the installation.

### **SAFETY**

On-site drilling and welding is avoided, encouraging safer site conditions and removing the need for hot work permits.

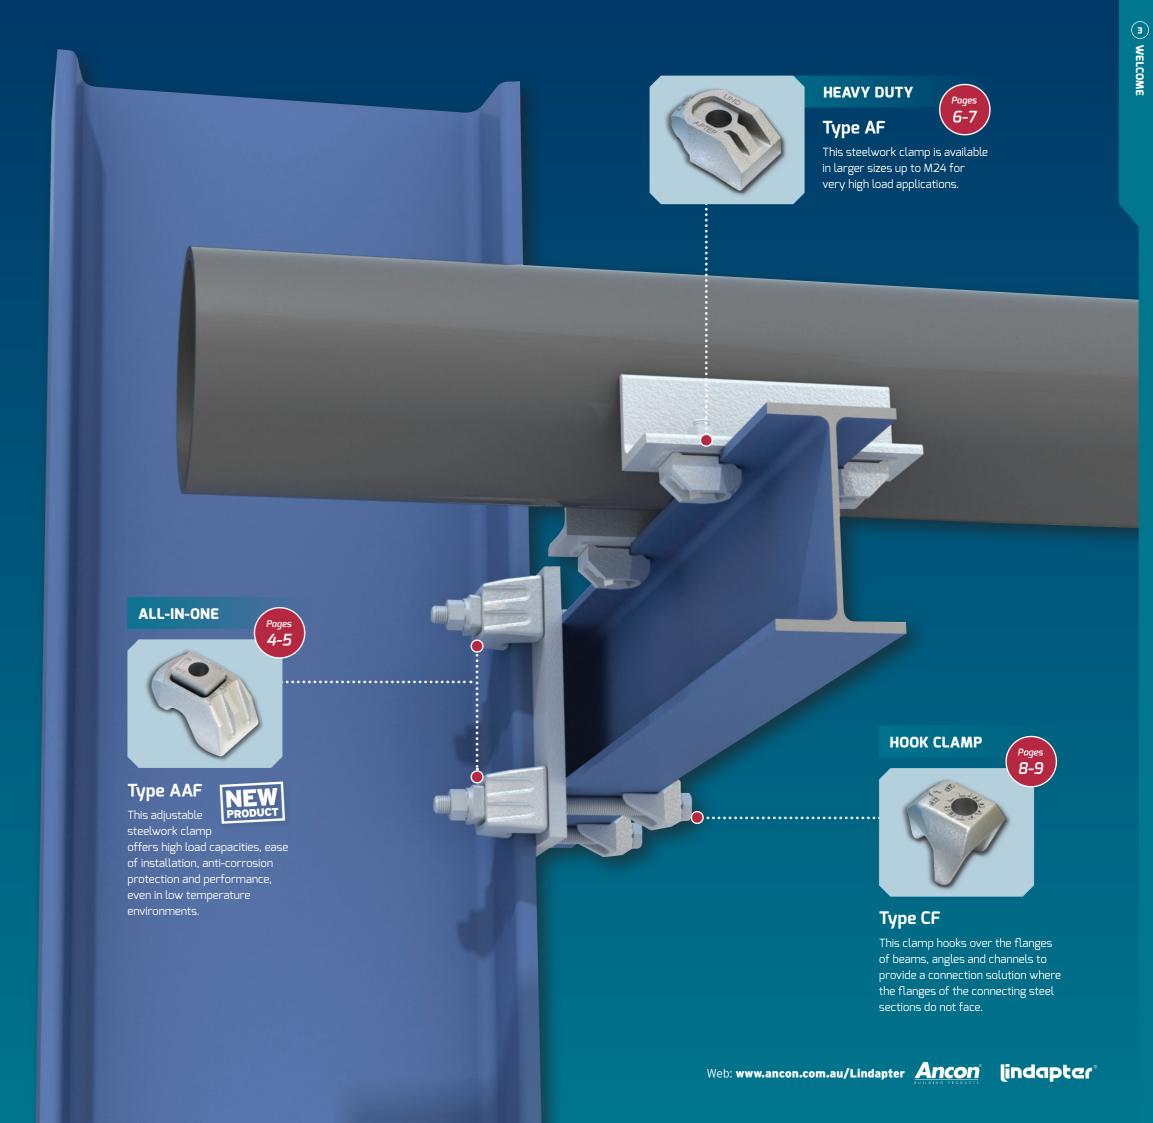

### **APPROVED SOLUTIONS**

Product specifications have been independently verified by TÜV Nord including resistance to slip, defined by TÜV Nord as movement in the connection that exceeds 0.1mm.

For more information, please see Page 11.

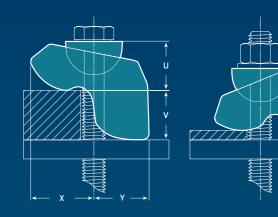

### **TECHNICAL DATA**

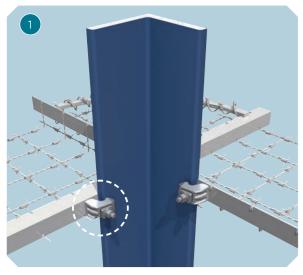

Material: Low temperature SG iron to EN 1563, hot dip galvanised to EN ISO 1461.

				Sa	fe Working Loa	ds		Dimensions						
				Tensile Resistance / 1 Bolt (F.O.S 4.5:1)	Slip Resistance <sup>1)</sup> / 2 Bolts (F.0.5 2:1)			V	Y	X	U			
	Product Code	Bolt		Bolt			Painted Steelwork <sup>2)</sup>	Galvanised Steelwork	Tightening Torque	Clamping Range <sup>3)</sup>				Width
		Size	Property Class	kN	kN	kN	Nm	mm	mm	mm	mm	mm		
	AAF12	M12	8.8	8.5	3.4	3.9	90	5 - 26	25 - 34	27 - 49	26 - 42	41		
	AAF16	M16	8.8	16.0	8.0	10.0	240	6 - 30	34 - 50	31 - 58	35 - 46	56		
	AAF12	M12	10.9	10.0	4.0	5.2	130 (100*)	5 - 26	25 - 34	27 - 49	26 - 42	41		
	AAF16	M16	10.9	19.5	11.0	12.0	300 (250*)	6 - 30	34 - 50	31 - 58	35 - 46	56		

- 1) Slip Resistance figures are based on Type AAF and Location Plates in hot dip galvanised finish calculated against slip (movement exceeding 0.1mm).
- 3) For thicker flanges, packing pieces AFP1 and AFP2 are available.
- \* Torque for lubricated bolts
- NB. Y, X and U will vary depending on the thickness of V.

TYPICAL APPLICATIONS

**Anti-climbing system for pylons:** The Type AAF adjusts to fit different thicknesses of steel and offers vertical adjustability.

Bridge strengthening: This combined loading configuration (slip resistance and tension) allows one connection design to be used on multiple sections.

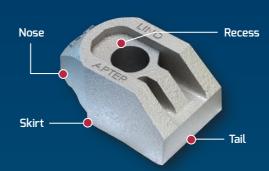

**Lifting points:** Lindapter manufactures customised assemblies for specific load requirements e.g. vertical, angle or horizontal

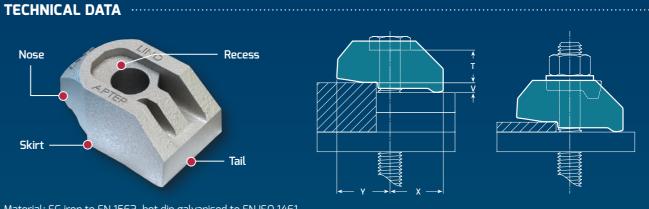

TYPICAL APPLICATIONS

**Roof supports:** The Type AAF is ideal for connecting to curved roofs. This assembly provides vertical and horizontal adjustability.

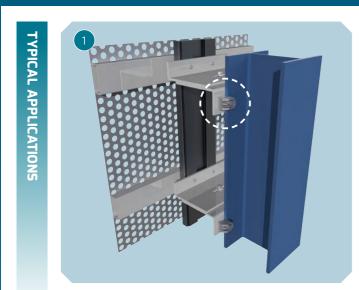

Material: SG iron to EN 1563, hot dip galvanised to EN ISO 1461.

- 1) Slip Resistance figures are based on Type AF and Location Plates in hot dip galvanised finish calculated against slip (movement exceeding 0.1mm).
- 3) 3.2:1 Factor of Safety

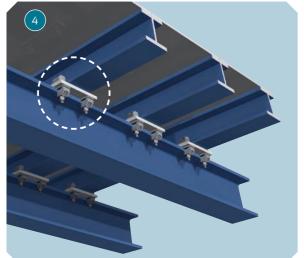

**Cladding support system:** Perforated steel cladding is connected to a vertical column providing vertical and lateral adjustment (Portello Project, Milan, Italy).

**Roof supports:** The iconic curved roof at St Pancras Station, London, is secured by Type AF clamps in an assembly that attaches roof supports to the original riveted steel frame.

**Conveyor supports:** This M24 Type AF clamp assembly provided a high tensile load capacity of 250kN required for the conveyor supports at Gatwick Airport, UK.

Bridge strengthening assembly: Type AF girder clamps are used to strengthen the up-line girders of Morton's Leam Bridge, Cambridgeshire, UK.

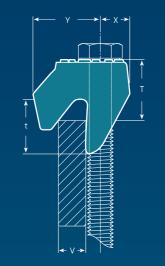

TYPICAL APPLICATIONS

<sup>\*</sup> Torque for lubricated bolts

### TECHNICAL DATA

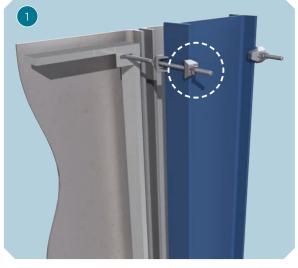

Material: SG iron to EN 1563, hot dip galvanised to EN ISO 1461.

	;			nsions	ns						
		Tensile Resistance / 1 Bolt (F.O.S 5:1)	Slip Resistance <sup>1)</sup> / 2 Bolts (F.O.5 2:1)			Y	x	v	т	t

- 1) Slip Resistance figures are based on Type CF and Location Plates in hot dip galvanised finish calculated against slip (movement exceeding 0.1mm).

  2) Shot blast and painted steelwork

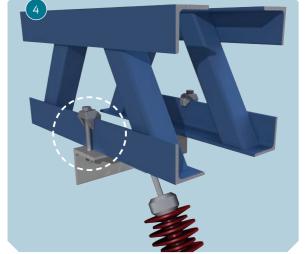

Cladding: The Type CF secures GRC panels to a vertical steel section, allowing both vertical and horizontal adjustment.

Roof supports: New steelwork is attached to an existing frame at the Chivas Regal Distillery, Keith, Scotland in an application that requires high slip resistant capacities.

**Towers and masts:** A communications antenna is secured to a tower with a connection assembly that is quick to install and offers vertical adjustability.

Overhead catenary support: Overhead line equipment is supported from a steel frame in a combined load application.

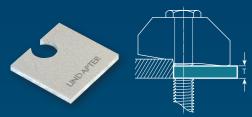

TYPICAL APPLICATIONS

**End Plate** 

## Type AF Accessories

### **PACKING PIECES**

Packings to adjust the clamp's tail length to meet different beam flange thicknesses.

Product Code	Bolt	<b>Dimensions</b> T (mm)
AF12CW	M12	2
AF12P1	M12	5
AF12P2	M12	10
AF16CW	M16	2
AF16P1	M16	5
AF16P2	M16	10
AF20CW	M20	2
AF20P1	M20	5
AF20P2	M20	10
AF24P1	M24	5
AF24P2	M24	10

### **TYPE AFW**

A washer used to fill the Type AF recess. Features two projections which, when the Type AFW is inverted, will captivate and prevent rotation of the larger hexagons of pre-loadable bolts to BS EN 14399 (M12 - M20).

Product Code	Bolt	<b>Dimensions</b> T (mm)
AFW12	M12	5
AFW16	M16	5
AFW20	M20	6
AFW24	M24	10

### **TAIL LENGTH / PACKING COMBINATIONS**

Parallel flanges and beams of up to 10° slope.

## Location and End Plates

This is an essential part of the girder clamp assembly that enables all the components to be located in the correct position. The hole centres and plate thickness are calculated to suit the individual application.

Plate length L<sub>2</sub> = Plate width l<sub>1M</sub>, l<sub>2M</sub> = Hole centres  $b_1$ ,  $b_2$  = Flange width Hole Ø

### **PLATE DIMENSIONS**

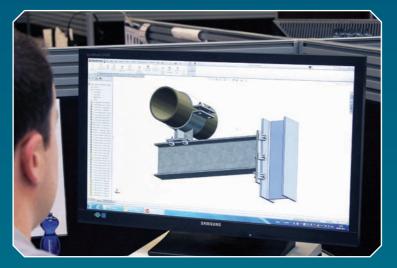

Material: Mild steel minimum grade S355 JR/J0/J2 to be specified by the Engineer to suit the application.

			Location Plate	2	End Plate <sup>1)</sup>						
Bolt	Hole Ø	Plate Hole Thickness Centres		Length / Width	Plate Thickness	Hole Centre	Length	Hole Centre	Width		
	d mm	mm	l <sub>1M</sub> , l <sub>2M</sub> mm	min l <sub>1</sub> , min l <sub>2</sub> mm	mm	l <sub>IM</sub> mm	min L <sub>1</sub> mm	min l <sub>2M</sub> mm	min L <sub>2</sub> mm		
M12	14	10	b + 14	b + 90	15	b <sub>1</sub> + 14	b <sub>1</sub> + 90	80	l <sub>2M</sub> + 80		
M16	18	15	b + 18	b + 110	25	b <sub>1</sub> + 18	b <sub>1</sub> + 110	100	l <sub>2M</sub> + 100

M24	26	25	b + 26	b + 180	40	b <sub>1</sub> + 26	b <sub>1</sub> + 180	200	l <sub>2M</sub> + 200		

1) Depending on the type of connection and associated end plate used, the thickness may need to be modified to comply with accepted local design codes.

# The Lindapter Support Service

Lindapter's experienced Engineers will design your connection free-of-charge to ensure a hassle-free specification process. Email your connection requirements to support@lindapter.com or call +44 (0)1274 521444 to speak with the Technical Support Team.

Undapter International supplies components in good faith, on the assumption that customers fully understand the loadings, safety factors and physical parameters of the products involved. Customers or users who are unaware or unsure of any details should refer to Lindapter international before use. Responsibility for loss, damage, or other consequences of misuse cannot be accepted. Lindapter makes every effort to ensure that technical specifications and other product descriptions are correct. 'Specification' shall mean the specification (relating to the use of the materials) set out in the quotation given by the Seller to the Buyer. Responsibility for errors or omissions cannot be accepted. All dimensions stated are subject to production tolerances - if in doubt please check with Lindapter. In the interests of improving the quality and performance of Lindapter products, we reserve the right to make specification changes without prior notice.
